819-OJ

APRIL 2008

Editor : KEITH RAPLEY, Schoolhouse, Main Road, Gateside, CUPAR, Fife KY14 7SZ.

Reports to the above address or by e-mail to OJ@psv-circle.org.uk

IN THIS ISSUE: Australia (New South Wales, Brisbane Transport, Southern Coast Transit, Darwin Bus Service), Austria (Blaguss), Falkland Islands, France (Depts 02, 03, 06, 06, 14, 34, 53, 59, 62, 67, 75, 76 & 80), Hong Kong, Hungary (Optare), Iceland (SBA), Italy (Bologna), Liechtenstein, Luxembourg (CFL), Malta, New Zealand (NZ Bus & Imported Buses), South Africa (Algoa Bus), Spain (Martin), Sri Lanka (Asia Bus Response), Switzerland, USA & Canada (CA), Euro Visitors & Registration Notes.

Its two-tone blue livery almost totally masked by road dirt, KT's NABI-badged Optare Excel IGR-575 waits between runs in Kaposvár on a freezing Hungarian winter's day in December 2007 (Daniel Stazicker).

Darwin was the largest purchaser of Leyland B21's, all fitted with Pressed Metal Corporation bodies. In this shot from December 1983, 40 (mo 8-040) is shown approaching the Harry Chan Terminal after its journey through the city centre. Destinations are shown already set for the outward journey (John Beckhaus).

Darwin Bus Service 116 (mo 8-116) is a Scania L94UA with Volgren CR224L bodywork. It is shown approaching the Casuarina Interchange in northern Darwin in January 2006. Two more Scania artics have arrived since although articulated buses have featured in the fleet for many years (Ian Lynas).

SOUTHERN COAST TRANSIT, PERTH

We haven't updated this fleet since the end of National Express ownership. Deliveries since then have been of the standard Transperth CNG-fuelled MB OC500LE / Volgren combination though there have been two batches for specific services, the Rockingham Shuttle and as replacements for the DAB midis on the CAT.

DARWIN BUS SERVICE

The origins of the state operator in Darwin, capital of Northern Territories, lie with the NT Administration Bus Service, which commenced running some school services in 1949. A small fleet of AEC Regal II, Bedford SB, AEC Reliance, Austin 2.45F and Hino was built up over the years until full statehood was granted in 1978 and the control of the operator passed to the NT Department of Transport and Works, as Darwin Bus Service. The first new vehicles to be delivered were rare Leyland B21 (fitted with Detroit Diesel engines) and the only Leyland-DAB artic to be delivered to Australia. The operator has continued to favour artics, in particular for the busy Route 10, Darwin-Casuarina. As Darwin itself has expanded many routes have been contracted out to independents, though only Buslink currently operates such tendered services. Both operators use the Darwinbus fleetname. The Darwin Bus Service depot is on Iliffe Street, in the Stuart Park area of Darwin.

Here we list all the vehicles known to be operated by Darwin Bus Service, including those inherited in 1978. Fleetnumbers don't appear to have been introduced until later; initially the vehicle registrations were used to identify the fleet, with vehicles being re-registered with 'mo' state numbers in 1978.

Vehicles inherited from NT Administration Bus Service

67, 68: gone c2004.

77, 78: Cardinia Transit, Melbourne 186, 184 c2004, as PWW [VIC] (later 4784 AO [VIC]), PRL 553 [VIC] (later 4782 AO [VIC]).

93: gone 2004.

AUSTRIA

In this edition I am listing all the known vehicles for Blaguss of Wien, who are the second largest private operator in Austria. Operations include local, interurban and international routes (including Eurolines), as well as private hire, coaching and sightseeing work (the last through the associated Wiener Rundfahrten), mainly in Vienna and Burgenland. A number of Austrian associates and subsidiaries operate under their own names while there are subsidiaries in Slovakia, Hungary and the Czech Republic.

Blaguss, Wien

This is not a complete list of all vehicles operated by the company but only has those vehicles which I know about. Where a registration or fleet number appears twice the earliest vehicle can be assumed to have gone or been renumbered/reregistered. If the same VIN appears twice it is normally because the vehicle has been reregistered and should be shown again on the next line down. As always, any comments or additional information are always welcome.

FALKLAND ISLANDS

The Falkland Islands have not previously featured in the OJ. This section has been prepared by Duncan Bingham, who would welcome any additional information about vehicles in the Falklands to 67 Easthorpe, SOUTHWELL, Notts NG25 0HY or by e-mail (duncanbingham@zoom.co.uk). Past 'Buses Worldwide' articles by Gary French and Alan Osborne are gratefully acknowledged as is the help of Andy Williams of Falkland Islands Tours & Travel, Paul Bateson, David Corke and various PSV Circle members and officials.

It is not believed that there were any full sized buses on the Falklands until after the 1982 conflict with Argentina. Initially, buses were used in relation to the construction of the RAF airfield at Mount Pleasant from 1983, but subsequently vehicles have been used on tours for cruise ship passengers or for airport transfers between the capital Stanley and Mount Pleasant. Tourism and fisheries have contributed to a strongly growing economy since the conflict.

The registration system was formerly an F-prefix followed by up to four numbers. This system is still continued for official (e.g. police) vehicles but from 1/7/86 the general system uses an F-prefix and then up to three digits followed by a letter (e.g. F999D, followed by F1E). FxxxF has been omitted. From 1983, UK registration plates were initially retained on vehicles used by contractors building the RAF airfield, but vehicles were later licensed with Falklands-issued plates, some of which were initially the same as the fleetnumbers carried by the vehicles.

General

Bernstein, Stanley. WHE 354J is (was?) used as a hen house. It was believed to have still been current in 1/05.

Blue Bus Co., Stanley. F1246 was converted from a van by 'Fred Ford's garage' (presumably of Stanley). It was replaced by a DAF 200 DAF M12 in 1995, which was itself replaced by another 12-seat vehicle (an LDV Cy?) in 2003.

Falkland Islands Company, Stanley. Routemaster F124G (ex JJD 593D) is used on tours of Stanley for cruise ship passengers. When noted in 1/08 it was out of use awaiting spare parts. F472-4G are all lettered for the Bluff Cove Lagoon Penguin Tour (www.falklandpenguins.com).Falkland Islands Tours & Travel, Stanley. (www.falklandtravel.com) 6 (F701B, ex A 54 NPP) was renumbered 22 by11/04. 7 (F127D) was resealed from C54FA prior to use and is due for imminent withdrawal - it is

possible that this is the former 03 KJ 39 (see MoD notes below). 16 (F596D) is left hand drive. 12 (F773D) is also left hand drive and was imported from Chile by a Stanley-based taxi company prior to use here. 1 (F200G, ex V352 OBA) is a Lincoln Destiny 100 8-seat stretched Limousine which was imported from the UK in mid-2006 and was still current in 1/08. The gaps in the fleetnumbers relate to commercial vans and lorries, although it is likely some other unknown PSVs have been operated.

LMA, Mount Pleasant. This was a joint venture by construction companies Laing, Mowlem and ARC to construct the RAF Airfield at Mount Pleasant and the vehicles were used to transport workers within the site and to and from Pioneer Camp at East Cove. The Bristols were the first full size buses on the islands and were prepared for shipping by Leyland at Brislington. LRN 304J was numbered LB1 by 4/85. LRN 282/4/7/94J were no longer licensed in 4/85, although may physically have still existed at that stage. WHE 354J and CHE 376K were renumbered LB17, LB14 respectively in 5/85. CHE 372/7/8/84K were initially numbered YT2/4-6 and were renumbered to LB13/5/6/8 in 5/85, but the order (before and after) is not known. After the contract, most of the vehicles were buried in a landfill site near MPA, although at least one was shipped to Chile.

Napier, West Point Island. MCA 617P was used to transport visitors from a cruise ship landing stage on the remote island to Devils Nose penguin and albatross colony. These duties were later undertaken by Land Rovers, but the Bristol remained current but out of use in 1/05.

Stewart, Stanley. Bob Stewart apparently established the first civilian bus service between Stanley and MPA in 1985. F211A (ex HKU 795N) was current in 11/93, by this time wearing a blue livery replacing Wimpey's yellow colours.

Wimpey, Mount Pleasant. The Wimpey-Taylor Woodrow consortium had an Army works contract at Mount Pleasant Airport from 11/84 and it seems likely that all three vehicles were exported to the Falklands at the same time. Two vehicles were registered on the islands as WTW8 and WTW9 by the consortium but the order is unknown. HKU 795N passed to PSA (The Property Services Agency – a division of the Department of Environment) acting as a disposal agent.

Ministry of Defence. Military buses are covered in the British Journal, but courtesy of Stephen Barton and with help from Alan Walker, a summary of vehicles known to have operated on the Falklands is as follows:

CTR, Menton 2513: new c11/92 to RCA 2513

General:

2513 was new to RCA, and passed to CTR in 4/06, pending delivery of a new fleet for the Menton urban operator. 2520 (492 BQG 06) has the same fleet number as 2520 (95 BDV 06) - see 813-OJ-212 for the explanation. While 95 BDV 06 was last reported in 3/05 and 492 BQG 06 was noted in 4/07, both buses carrying fleet number 2521 (96 BDV 06 and 490 BQG 06) were seen 9/06.

3015/21 are also reported as Rt Iliade. 3023 has also been reported as 253 BNM 06.

3243 is reported as carrying registration 243 ASX 06 by 5/03 (previously shown as 3521 YZ 06). This would suggest that it had previously been reregistered in Monaco, alternatively it may be an error for one of 3244-6.

Another 39xx series Iliade has been reported with Monaco registration 5848 (seen 6/02). It may be a vehicle that has not been reported so far (fleet numbers 3928/9, 3934-9 are blank) or else an error for 3932 (Monaco registration 5748).

4529, 4705 should be added to the fleet list given in 813-OJ, having resurfaced in 1/05.

6008 has also been reported as 758 BCR 06.

Many thanks to Robert Togni for providing most of the material on RCA.

General:

Les Courriers du Midi is a former VIA-GTI company that is now part of Keolis. The four-digit numbers were assigned in the VIA scheme, while the five- and six-digit numbers are in the Keolis system, with the first two digits denoting the year of manufacture. Many thanks to Clive D'eath for procuring this list.

New vehicles

417	6534	TB 53	MAN NL243 CNG	MAN B--T	by 10/07
418	6536	TB 53	MAN NL243 CNG	MAN B--T	by 10/07

General

Three gas-powered MAN NL243 were delivered some time ago, though fleet numbers have not been reported. The fleet numbers for this pair suggest that at least another three are owned.

---------------------	-------	--

Département 67 (Bas-Rhin)CTS, Strasbourg

Withdrawals: by 10/07 470/1/5-7 (GX317 - the first to go), 524/6-32 (AG300)

Disposals: 470/1/5-7, 528-32 Kunegel, ?? by 10/07
524/6/7 Trans'L, Villers-la-Montagne [54], by 10/07

General

As with previous disposals (SC10R 933/4 and R312 414), it is not certain which Kunegel company is involved, but it is a subcontractor to CTS and the buses presumably retain CTS livery, if not fleetnumbers. Kunegel now works service 21 with the AG300 and 27 with the GX317, the former being the international urban service to Kehl, just across the Rhine in Germany.

HUNGARY

While under the control of NABI, Optare built a small number of left hand drive Excels to be sold in Hungary by its parent company. Only two customers were found, one of these in NABI's home town (which also took the two demonstrators). A single left hand drive Solo was also supplied. NABI tried again with the 700SE, a Scania L94UB with a locally-built Excel-like body but this too failed to make much of an impression on the market. Thanks in compiling this list are particularly due to Daniel Stazicker for the reports of his visits to Hungary.

IDU-795	Oe	M920L	SAB26000000000001	Oe		B??D	c5/02

Notes –

HJN-778 was delivered to Hungary in a red/green/yellow/white colours inspired by the Trent/Barton 'Rushcliffe Lines' livery then being applied to a contemporary batch of Excels. It appeared at a bus show in Budapest 10/00 and then went on demonstration loan in Budapest (noted 11/01) and then to other operators. It passed to Kaposvári Tömegközlekedési by 2004 and was re-registered KCL-745. It was still in service in its original livery late 2007. The VIN is equivalent to the chassis number VN9504, with which it shares the last three digits.

IDU-560 was delivered in a blue and white livery, which it retained after passing to Kaposvári Tömegközlekedési by 7/04. Between 8/02 and 9/03 it is known to have been on demonstration loan in Debrecin.

IDU-795 was the only left-hand-drive Solo known to have been delivered to Hungary. The VIN is in the 30-LFN sequence for the USA. After demonstration duties it is believed to have passed to the small municipal operator in Siofok, registered FLC-811, but a physical check of the latter's VIN has not been made to confirm that these are indeed the same vehicle.

ICELAND

Here we present some additional information on the SBA-Norðurleið fleet published in OJ-36. Certain vehicles recorded as new are in fact acquisitions.

The Setra S315H is a common sight in the Blaguss colours of silver and red but 8156 (W 1093 LO) was in a racy advertising version of the scheme when caught at Südtiroler Platz in Vienna in July 2006 (Keith Rapley).

No Leyland Tigers have ventured further south than here. Falkland Islands Tours & Travel 3 (F186G, ex F711 ENE, IIL 7075, F711 ENE), a Plaxton-bodied example new to Smith Shearing, sits under a cloudless Southern Hemisphere summer sky in January 2008 (Paul A. Bateson).

This Jit Luen-bodied Volvo B6LE was new as Citybus 1335 but passed to New Lantau in May 2007 as VL04. HU 4796 is seen here at Hong Kong's Tung Chung Bus Terminal in November 2007 (Paul McNamara).

ATC, Bologna 5331 (AG 660 BD) is a very early example of the Iveco CityClass, production of which has recently ceased in favour of the Irisbus Citelis after a ten-year run. This April 2007 shot shows off the 'quattroporte' arrangement so beloved of Italian bus operators (Keith Rapley).

A one-off batch of fourteen MAN interurbans was purchased by CFL in 2005. 49 (ZN 6618) is an Sü313, badged as a Lion's Classic, parked outside Luxembourg Ville's Gare Centrale in November 2005 (Paul McNamara).

Former Reading Optare Excel 915 (P915 GJM) is now 636 (EFT 336) with Ritchies. Unlike most Excels in New Zealand this one has retained its single-door layout and is usually used on school runs. The destination screen is a reminder of its Berkshire past (Peter Thompson).

The original Volvo 9900 was a premium coach based on the B12B chassis with bodywork built at the wholly-owned Drögmöller plant in Heilbronn. It never really took off and in 2005 Volvo closed the plant. Caught visiting York in February 2008 is LIP-RW 100 of Rolf Wieneke, Detmold, in Hänschen Reisen livery (Terry Stapley).

Madrid's public transport scene is more varied than that of most European capitals. Empresa Martin 942 (M-3054-ZJ), a MAN NL263F with Caetano CityGold bodywork, is seen here at the Madrid terminus of route 484 in July 2005 (Paul McNamara).

LUXEMBOURG

The state railway company, CFL, operates bus routes across the country. The batch 101-14, currently being disposed of, represents the last of the Volvos and the last remaining vehicles from the 'old' numbering sequence. The main depot is at the central railway works in Luxembourg Ville, with a smaller garage at the bus station in the town of Echternach. Here we list all the additions to the CFL fleet since the nominal cut-off date of 1990, courtesy of Ian Kent, with much-appreciated input from Raymond van den Hoven and Ron Dohmen of the Spoorgroep Luxemburg (www.spoorgroepluxemburg.nl). Some of the vehicles listed in OJ1997-68 to 77 are included here for completeness.

Société Nationale des Chemins de Fer Luxembourgeois (CFL), Luxembourg

Cancu Supreme, Zejtun. COY 006 (ex A 56 THX) to service 12/07; COY 007 (ex OHV 811Y) to service 12/07; COY 008 (ex OHV 792Y) to service 12/07; COY 009 (ex OHV 720Y) to service 3/08.

General

Cancu Supreme, Zejtun. With the arrival of the Ld TN both open top routes became operational.

NEW ZEALAND**NEW ZEALAND BUS (former STAGECOACH GROUP)**

Further local identities have appeared in the last few months. Cityline Hutt Valley vehicles are now in a purple and orange livery branded as 'Valley Flyer' and Transportation Auckland Corporation vehicles allocated to Swanston depot in Auckland's western suburbs are appearing in a green and grey 'Go West' scheme. Runciman Motors and Fullers are also believed to have new liveries but the main Auckland fleet is still in the inherited Stagecoach stripes. Coach operator Adams Travelines of Whangarei, in the Northlands, was taken over at the end of 2007 and renamed North City Bus Limited; fleet details to follow, when available, but it is known that the fleet has been renumbered into the NZ Bus scheme.

Notes:

These are of the new Lion's Explorer type, an improved version of the front-engined Explorer built in South Africa. The Lion's Explorer range consists of the following model codes: HB1 – 4x2 chassis, 240hp MAN Euro 3 engine, ZF Manual transmission; HB2 - 4x2, 240hp, Voith automatic; HB4 – 6x2, 310hp or 350hp, MAN TipMatic; HB4BT – 8x2 artic, 310hp or 350hp, MAN TipMatic. Also available in South Africa is the A84 model, a 4x2 rear-engined, low-entrance city bus with MAN 280hp engine and Voith automatic. It should also be noted that

construction of the Algoa batch of HB2 was split between the established Pretoria plant ('PX') and the new Johannesburg plant ('JB').

SPAIN

Empresa Martin S.A. was formed by Sebastian Martin in 1965 to operate interurban routes in Madrid. Now it operates 19 routes on the following corridors: Madrid-Leganés-Fuenlabrada, Madrid-Carabanchel Alto, Leganés-Carabanchel Bajo.

SRI LANKA

Sri Lanka Transport Board (S.L.T.B.)

The following 17 double-deckers have been operated by the S.L.T.B. following acquisition via Asia Bus Response after the 12/04 tsunami. Initially they all operated from Negombo, Maharagama and Ratmalana depots but only a few remain in service in 2008. S.L.T.B. does not use fleet numbers but vehicles display their depot code (e.g. NB is Negombo) plus a depot serial number – those known are shown. Dates shown are those of registration; shipment was 6/05.

Notes:

NA 2212 (ex SSG 504R) had been a playbus with Play on Wheels, Edinburgh (XSS) before the Lothian Bus Club; there must be doubt that it was reconverted back to a bus, so did it see 'non-PSV' use in Sri Lanka? First Manchester 30309 (F603 XWY) and 30337 (F294 NHJ) were the other double-deckers acquired by Asia Bus Response. These were not exported to Sri Lanka but passed to PVS, Carlton (Q) 8/05, for scrap.

In addition 17 single-deckers were exported from Asia Bus Response to Sri Lanka, date unknown but probably 7/05, this being the date of the import licence. Upon arrival they were handed over to the Minister for Communications who then subsequently passed them to the Transport Ministry. None has entered service with the S.L.T.B., nor is likely to, but an odd one may be used by a hotel or school, but none have been seen. These buses are:

It should be noted that vehicles donated via the Asia Bus Response also went to Indonesia, though reports from Aceh province are somewhat thin on the ground. It would seem that many of the larger single-deckers went to Indonesia and were used as mobile classrooms and the like. Contemporary reports gave the figure of 100 buses split between Indonesia and Sri Lanka sent out in June 2005. A second tranche intended for Sri Lanka in December 2005 didn't leave the UK due to Sri Lankan government demands on spares and support.

USA & CANADA

This issue I am endeavouring to bring California up to date but the job is made more difficult on two fronts: one, we haven't visited California for at least 5 years now, and secondly all my news-sheets and reference books are still in storage after last year's floods. I am most grateful to Bob Martin and our son Peter, both of whom visited California in 2005 and have shared their extensive notes with me, and to Maurice Bateman for his help; I also acknowledge use of data extracted from the British Buses Abroad in North America e-group. Please remember, **your** reports are most welcome and should be sent to me, Brian Coney, at 47 Paynesdown Road, THATCHAM, Berkshire, RG19 3SE (e-mail address: coney@ic24.net).

Note that in the Previous Owner column, "pko" stands for "Previous Known Owner"; there may have been intermediate owners of whom we are unaware.

California (CA)

Corrections to OJ762: please delete the entries pertaining to '-?-', Aguanga' – owner now identified (see below)

General

ASUCD {Unitrans}, Davis. KYY 712 (RTL1014) was withdrawn from active service during 12/07 amid much local media coverage in the press and on television.

British Bus, Spring Valley. NHU 672R and OWE 853R were converted for use by Wal-Mart as exhibition units to promote Rimmel cosmetics. British Bus also acts as a dealer and has supplied buses not listed above to customers in the USA e.g. SMK 689F (RML2689) to Green Bay, Wisconsin, and SMK 728F (RML2728) to a lady in Alabama.

City Sightseeing, San Francisco. BYX 121/310/14V and GYE 553/600W are named ‘Leeds’, ‘Chesterfield’, ‘Newcastle’, ‘London’ and ‘Glasgow’ respectively.

REGISTRATION NOTES

As ever, changes continue to be made in regard to registration plates around the globe. Perhaps of greatest interest to OJ readers are those introduced recently in **Chile** for buses conveying passengers in the new Santiago Metropolitan Region. The plates are in normal format of two letters, a square hyphen, two numerals, a decimal point and two numerals. Unlike the black on white normal series plates they are coloured turquoise on white and

have TRANSANTIAGIO across the bottom. Normal series plates have exhausted this format and now adopted a two letters, two letters, two numerals format. It is presumed that other vehicles will also change.

New plates have been introduced in **Cyprus** for antique vehicles. What actually qualifies for these is not yet known, but the plates are silver on black with three numerals and one letter.

In **Malta** open-top buses now have plates in the xOY series (O for open top and Y for psv, the first letter denoting the month of expiry).

In **Ecuador** the current series of plates appears to have been exhausted in Pinchinta which has now adopted three letter and four numerals (previously three numerals), but otherwise unchanged. The plates have been enlarged to accommodate the extra character. So far these have only been seen in black on white, the colours used for private cars.

Moldova has adopted a hard line attitude to the breakaway region of Transdnistra and the authorities are seizing the Transdnistra plates off any car which enters Moldova. Most plates have the Transdnistra flag followed by a vertical line, an area code letter, three numerals and two letters. It has now been established that the code letters are: A = Bendery, T = Tiraspol, C = Slobodzeya, B = Grigoriopol, E = Dubossary, P = Rybnitsa and K = Kamenka.

In the **United States** new diplomatic plates are being introduced and will replace the former series in the next few months. The plates have a red band across the top with DIPLOMAT or CONSUL whilst the registration of three letters and four numerals (or the reverse) is in black on light blue, still coded as the former series.

Jordan has new plates with two numerals, a decimal point and up to five numerals. The first of the two numerals are a vehicle code with 1 for private vehicles, 3 for people carriers, 4 for light utility vehicles, 5 for taxis and 7 for rental cars. Most of the plate is black on white but on the left is a band with the country name in Arabic above JORDAN. The band varies with the vehicle type: black on white = private, white on green = taxis, yellow on green = rental.

Although not known for its buses, the **Maldives** plates introduced in 2003 are now understood. On the upper line, in a smaller size, are one letter (an island code), a letter and a numeral (a vehicle code: B1 = private cars) and a serial letter. On the lower line is a vehicle type letter and four numerals. The vehicle type letters and the colours of the plates are: P = private vehicle (white on black); T = taxi (black on yellow), C = company (white on black), S = national security service (white on black), G = government (white on black) and D = diplomatic (white on blue). Why such a small country should require such a complex system of vehicle registration remains a mystery!

Uzbekistan has introduced new plates but as yet no photographic evidence is available. Plates for private vehicles are black on white with a two digit area code (in a smaller size), one letter, three numerals and two letters followed by the national flag above UZ. Commercial vehicles have similar plates but using the format of the area code (again in a smaller size), three numerals and three letters. There are also 12 other types of plates. In each case a two line version of the plate is available. These plates will supercede existing plates from early 2011.

Nicaragua has a completely new series of plates, still with NICARAGUA at the top and CENTROAMERICA at the bottom. The registration consists of one or two letters denoting the department (M = Managua) followed by four or five numerals. Plates for private vehicles, trucks and commercials are black on white with a blue map of the country as a background. Various other colours are used for taxis, municipal vehicles, diplomats, etc.

Perhaps the most important change in the pipeline is **France** where a completely new system will commence from 1st January 2009. Readers may have already noticed that newer French plates are now black on white at both front and rear. Commencing next year the new plates will be completely serial using two letters, three numerals and two letters, the elements being separated by hyphens. The series will start from AA-001-AA and continue until ZZ-999-ZZ is eventually reached. All plates will have a mandatory French euroband on the left. An optional blue band may appear on the right with a regional emblem above the existing département code: the emblem and code must be consistent - for example, a Brittany emblem could not have a Normandy code below it. Existing plates will be changed as vehicles are inspected so that within five years all the current plates will cease to be legal.

Irisbus subsidiary Orlandi has replaced its familiar Domino coach bodywork with the 'New Domino', fitted to the EuroRider chassis. This example, on rail replacement work outside Rome's Termini station in April 2007, is 506 (DF 329 LK) of Cialone Tour, Ferentino, new in February of that year (Keith Rapley).

Another Italian coachbuilder, Barbi, has had a long association with Volvo. This example of Antares bodywork is on a B12B chassis new in 2005. Autoservizi Delaini is based in Ala, in Trentino-Alto Adige, but CS 398 NH was visiting Bergamo in this shot from April 2007 (Keith Rapley).

BTV 657T, new to Nottingham but also operated by Guide Friday, is seen here as it leaves the base of British Bus, Spring Valley, CA, for another assignment. In this November 2005 view, it carries an all-over promotional livery for Finlandia Vodka (Peter Coney).

TRT 98M was new to Ipswich as their number 98 but then served as the Ipswich Playbus for a number of years. It was then converted back to a bus and exported a few years ago to British Bus, Spring Valley, CA, from whose base it is seen leaving adorned in an overall-advert livery for Southern Comfort in another view from November 2005 (Peter Coney).
